D

I. PRIVATE LINE SERVICES AND CHANNELS

D

A. General

Intraexchange Private Line Service is facilities furnished by the Cooperative for telecommunications, signaling, telemetry and electrical control purposes, solely for the use of a customer within the same Exchange Service Area.

TM

1. Channels for services not specifically named elsewhere in this tariff, and for purposes other than telecommunications, will be furnished where facilities are available and where, in the judgement of the Cooperative, the use to be made of such channels is not contrary to Cooperative regulations or detrimental to other services.

2. The Cooperative does not represent to furnish channels with a transmission level of a grade better than circuits used for normal telecommunications. Higher grade channels will be provided only when physically and economically practicable on the part of the Cooperative as provided in Paragraph 3 below.

Box 1304, Tahoka, TX 79373

Effective:

MEMBER SERVICES TARIFF

MISCELLANEOUS SERVICE ARRANGEMENTS

I. PRIVATE LINE SERVICES AND CHANNELS (Continued)

TM

A. General (Continued)

3. Channels, when adaptable, may be used for alarm, telemetry, teletype-writer, control and other similar services at the same charges. If modifications are required, additional monthly rates, installation and/or construction charges based upon costs will be applicable as provided in Section 6, Special Service Arrangements.

4. Private line service may not be connected to the telecommunications network for local exchange service or long distance message service.

5. Channels, for use in connection with interexchange facilities for radio broadcasts; channels between pick-up points and a radio station and studio, between studio and/or station and transmitter will be furnished at published rates of the the Private Line Services Tariff which Southwestern Bell Telephone Company has on file with the Public Utility Commission of Texas.

B. Rates for Interexchange Private Line Service Channels

1. Private line Channels are measured by circuit distance. The following rates are applicable to all standard types of channels listed above:

T

		Mo. Rate	I.C.
a. Local Channel, 2 Wire			
First 1/2 mile or fraction	(LPR)	\$2.00	(1)
b. Each additional 1/4 mile			
or fraction	(LPM)	.75	
c. Local Channel, 4 Wire			
First mile or fraction	(LCB)	\$4.00	(1)
d. Each additional 1/4 mile			
or fraction	(LPM)	1.00	

Note: (1) An installation charge equal to the cost of labor required to install above channels is applicable to each channel in lieu of a Service Connection Charge. The minimum installation charge will be \$20.00.

I. PRIVATE LINE SERVICES AND CHANNELS (Continued)

B. Rates for Interexchange Private Line Service Channels

2. Extension Line Mileage

The rates and charges set forth below apply if the necessary facilities are available. If unusual expenditures are involved in making facilities available, the customer may be required to pay an additional charge to cover the unusual expenditure and/or to contract for service beyond the initial service period. The rates are applicable for a maximum of one thousand (1,000) feet for residence service. For distances over one thousand (1,000) feet, another residence line will be required.

a. Application of Rates

Mileage is calculated for the route distance between buildings or premises for each two-point extension channel. Mileage is calculated in 100 ft. increments with fractions rounded to the next higher 100 ft. for each line.

Detached Extension Line

	<u>Mo. Rate</u>
(1) First 100 feet (@DM)	\$1.00
(2) Each add'l 100 ft. or fraction thereof (@DM)	\$1.00

II. OTHER RULES AND REGULATIONS

In addition to rules and regulations set forth in this tariff section, the General Rules and Regulations established in Section 3 are also applicable to any services and facilities provided herein.

IV. JOINT USER SERVICE

A. General

1. Joint user service is an arrangement whereby an individual, firm, corporation or an association doing business under a separate name may share in the use of a primary customer's business telephone service. To facilitate this use, an alphabetical and classified directory listing will be provided for each joint user without additional charge. The customer's facilities will not be extended off the premises on which the primary service is located to provide joint user service only.

2. Joint user service is furnished upon application as follows:

(a) Application for the use of the customer's service by an individual, firm, company or association doing business under a separate name and occupying jointly, or in part, the premises on which primary service is located, or the premises on which the customer has existing off-premises service.

(b) Application for the use of the customer's service for another business publicly conducted by the customer and differing in character or scope and in name from the business for which the facilities are furnished.

(c) Application for service to be furnished over the facilities utilized in furnishing service to the customer, but in the name of another individual, firm, company, corporation, or association represented by the customer if the use of the name to be listed is authorized by the owner of the name.

APPROVED

EFFECTIVE DATE: 12/1/12

MEMBER SERVICES TARIFF

MISCELLANEOUS SERVICE ARRANGEMENTS

IV. JOINT USER SERVICE (Continued)

A. General (Continued)

3. Joint user service will not be applicable when, in the opinion of the Cooperative, the service arrangement requested does not constitute the sharing of the primary customer's telephone service.

4. The minimum charge for joint user service shall be the monthly rate as set forth in this section. If a listing is included in the telephone directory, the charge will continue until the end of the directory period unless:

- (a) The joint user vacates the primary customer's premises.
- (b) The primary customer's service is discontinued.
- (c) The joint user becomes a customer to business service in the same exchange.

5. Joint user service is not furnished in connection with foreign exchange service.

V. TELEPHONE CALLING CARD SERVICE

TM

Telephone Calling Cards may be issued to customers who have established telephone service and shall have established and maintained proper credit as set forth in Section 3, Part VI, Establishment and Maintenance of Credit.

Telephone Calling Cards permit the customer to place toll (long distance) calls from locations other than the telephone number the card is issued on and are valid only for charging calls to the telephone number to which it is keyed.

Telephone Calling Cards may be issued as Full Service Calling Cards which authorize calls from any telephone service to be charged to the Calling Card by the card holder. Calling Cards issued to provide Restricted Service authorize calls from any telephone service to only the number on which the Calling Card is issued by the card holder.

The customer will be responsible for all calls made with the assigned Calling Card. The Cooperative must be notified at once if the card is lost or stolen.

Telephone Calling Cards are not transferable and become void when the telephone service to which the card is keyed has been disconnected. Cards can be cancelled at the discretion of the Cooperative for valid cause and remain the property of the Cooperative.

Calling Cards may be issued on an annual basis and will be reissued with a new number automatically before the expiration date, provided the customer has properly maintained credit as specified in Section 3.

VI. VACATION SERVICE

T

A. General

Vacation Service is provided to individual line customers whose requirements for telephone services are less than that which might normally be provided in any twelve (12) month period, and are not applicable to multi-line accounts.

Upon request from a customer having any class of individual line exchange service, the service may be suspended for a period of one month or more. No outward or inward service is provided during the period of suspension. Credit card or third number long distance charges may not be charged to a number that is on temporary suspension or vacation rates.

MEMBER SERVICES TARIFF

MISCELLANEOUS SERVICE ARRANGEMENTS

VI. VACATION SERVICE

Temporary suspension of service may begin and terminate on any day of the month, provided notice is given sufficiently in advance for arrangements to be made. A restoration of service charge will be made when service is restored. If service is restored at a location other than where service was suspended, the applicable service charges will apply.

Charges may be billed in total prior to the suspension of service or monthly at the option of the Cooperative.

B. Rates

The monthly rate will be based upon 50% of the regular rate for the basic access line charge suspended for a minimum of 30 days and a maximum of 180 days. Services other than basic local service will be billed at the full monthly rate.

Issued By: Mickey Sims, General Manager
Box 1340, Tahoka, TX 79373

Effective:

VII. DIRECT INWARD DIALING (DID) SERVICE

A. General

1. Direct Inward Dialing Service consists of the central office switching equipment necessary to provide direct inward dialing from the local exchange and long distance telecommunications network to stations and attendant positions associated with customer premises switching systems.

2. The provision of DID Service is subject to the availability of Telephone Cooperative facilities and telephone numbers and the utilization of appropriate customer premises equipment.

3. DID Service must be provided on all lines in a trunk or access line group arranged for inward service. The service does not contemplate the routing of calls to selected numbers within the direct inward dialing number group over a separate trunk or access line group.

4. The operational characteristics of interface signals between Telephone Cooperative-provided connecting arrangements and customer-provided switching equipment must conform to Telephone Cooperative specifications.

5. The Telephone Cooperative shall not be responsible to the customer or authorized user if changes in protection criteria or in any of the facilities, operations or procedures of the Telephone Cooperative render any customer-provided facilities obsolete, require modification of or otherwise affect the use or performance of such facilities.

6. The Telephone Cooperative will provide directory listings in accordance with the regulations of Section 7 of this Tariff. Direct inward dialing numbers furnished under these provisions are not entitled to free directory listings.

MISCELLANEOUS SERVICE ARRANGEMENTS

VII. DIRECT INWARD DIALING (DID) SERVICE (Continued)

A. General (Continued)

7. Customer-premises switching systems must be able to intercept unused numbers transmitted to the switching equipment.

8. The rates and charges for this service contemplate the use of standard Telephone Cooperative equipment and serving arrangements.

9. Direct Inward Dialing telephone numbers are normally provided in blocks of 10 or 100 consecutive numbers. However, the blocks may be provided on a nonconsecutive basis if this is within the normal limitations of the serving office. The Telephone Cooperative retains its rights to the telephone numbers used in DID Service as provided in Section 3 of this Tariff. T

B. Rates

	<u>Monthly Rate</u>	<u>Installation Charge</u>	
Direct Inward Dialing Service to Customer-Premises Switching Systems:			
Block of 10 DID Numbers Assigned	\$11.00	\$100.00	N
First 100 DID Numbers Assigned	\$110.00	\$100.00

VIII. DIRECT OUTWARD DIALING (DOD) SERVICE

A. General

1. Direct Outward Dialing Service consists of the central office switching equipment necessary to provide direct outward dialing to the local exchange and long distance telecommunications network from stations and attendant positions associated with customer premises switching systems. The service includes the central office equipment necessary for identification of outgoing long distance message telecommunications service by trunk group.

2. The provision of DOD Service is subject to the availability of Telephone Cooperative facilities and telephone numbers and the utilization of appropriate customer premises equipment.

3. DOD Service must be provided on all lines in a trunk or access line group. Where the service is requested and provided on more than one trunk or access line group, each such group will be considered a separate service in determining charges.

4. The operational characteristics of interface signals between Telephone Cooperative-provided connecting arrangements and customer-provided switching equipment must conform to Telephone Cooperative specifications.

5. The Telephone Cooperative shall not be responsible to the customer or authorized user if changes in protection criteria or in any of the facilities, operations or procedures of the Telephone Cooperative render any customer-provided facilities obsolete, require modification of or otherwise affect the use or performance of such facilities.

IX. CUSTOM CALLING SERVICES

A. General

1. Custom Calling Services are optional telephone service arrangements which may be provided only from central offices equipped to provide one or more of the following custom calling features:

a. Call Waiting - By means of a tone signal a customer who is using his telephone is alerted when another caller is trying to reach that telephone number. This permits putting the first call on hold so that a second call can be answered.

b. Call Forwarding - Permits a customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which all incoming calls are to be transferred automatically. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. Customers utilizing Call Forwarding Service are responsible for the payment of charges for each toll call between his access line and the distant access line to which the call was transferred.

c. Three Way Calling - Enables a customer to add a third party on an existing call without operator assistance, thereby establishing a three-way conversation. The transmission quality may vary depending on the distance and routing necessary and may not meet normal standards.

X. ADVANCED CALLING SERVICES

(N)

A. General

1. Advanced Calling Services (ACS) consist of a group of features individually described under Section B which allow customers to efficiently manage the communications over their Exchange Access Lines. This call management is possible only when the calling party's telephone number can be delivered from the central office originating the call to the terminating central office serving the called party. ACS features are optional services offered in addition to regular exchange service.

2. ACS features are available to residence and business customers subject to the availability of Central Office equipment and facilities. Individual feature availability may differ by exchange.

3. To use Advanced Calling Services, customers must dial a specific designated activation code.

4. ACS features will be functional under the following conditions:

a. When both the originating customer and the terminating customer are served from the same central office.

b. When both the call originating customer and the call terminating customer are served from different central offices equipped for ACS and are linked by appropriate facilities.

5. Advanced Calling Services may not function when calls originate from or terminate to equipment not suitably equipped for Advanced Calling Services.

6. The telephone company shall not be liable for any loss or damages arising out of error, interruptions, defects, failure, or malfunctions of ACS Services or equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Telephone Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.

X. ADVANCED CALLING SERVICES (continued)

B. Feature Descriptions

Advanced Calling Services are optional telephone service arrangements which provide one or more of the following features.

1. Repeat Dialing - Enables the customer to automatically redial the last outgoing telephone number dialed. When the recalled telephone number is busy, the telephone company's equipment will make repeated attempts to establish the call for a thirty (30) minute period beginning with the customer's activation.

2. Call Return - Enables the customer to automatically redial the telephone number of the most recent incoming call. The telephone company's equipment will make repeated attempts to establish the call, for a thirty (30) minute period beginning with the customer's activation of Call Return if the telephone number for the most recent incoming call. The feature cannot be activated for calls originating from a line that is forwarded or from a line not associated with a telephone number, e.g., multiline hunting groups.

3. Call Trace - Enables the customer to initiate a trace of the last incoming call completed by dialing an activation code immediately after terminating the call. If a trace is successful, the telephone company's equipment will record the results of the trace will note be provided to the customer directly. For further action to be taken, the customer is required to contact the telephone company Business Office during normal working hours and work days. Call Trace detail will be retained by the company and made available for 10 business days after the trace has been initiated.

4. Priority Ringing - Provides the customer with a distinctive alerting signal, ring or call waiting tone (if the customer has subscribed to Call Waiting), when the customer is called from a maximum of six (6) preselected telephone numbers. The customer can construct or modify a telephone number screening list by dialing a unique code. The telephone company's equipment will screen incoming calls against the customer's list and provide a distinctive ringing pattern for telephone numbers on the customer's list.

B. Feature Descriptions (continued)

5. Preferred Call Forwarding - Enables the customer to forward incoming calls from a maximum of six (6) specified telephone numbers to another telephone number. The customer can construct or modify a telephone number screening list by dialing an activation code. The telephone company's equipment will screen incoming calls against the customer's list and forward only calls from telephone numbers included on the list. Calls forwarded by this feature are subject to all applicable local and long distance charges. These calls are also subject to transmission limitations.

6. Call Blocker - Enables customers to block the last incoming call or calls from a maximum of six (6) specified telephone numbers. To block specified telephone numbers, the customer can construct or modify a telephone number screening list by dialing a unique code. The telephone company's equipment will screen incoming calls against the customer's list and block those on the list. If facilities are unavailable to provide incoming call blocker via the customer's list, standard call completion will occur. To block unknown telephone numbers, a customer can dial a special code after an unwanted call and block the number. Callers whose numbers are blocked are directed to a telephone company recorded announcement.

7. Special Call Acceptance - Enables a customer to designate a maximum of six (6) telephone numbers from which calls will be accepted. The customer can construct or modify a telephone number a screening list by dialing a unique code. The telephone company's equipment will screen incoming calls against the customer's list and complete calls from numbers on the customer's list. Calls from all other numbers will be routed to a recorded announcement.

8. Anonymous Call Rejection (ACR) - Allows subscribers to automatically reject all calls that have been "blocked," and therefore marked anonymous by the calling party. When ACR is active, the called party receives no alerting (ringing) for a call that has been rejected. The call is routed to a denial announcement and subsequently terminated.

9. Call Forwarding-Busy/Don't Answer - Allows an incoming call to the customer's line to be automatically forwarded to a preselected telephone number within the exchange or on the long distance telecommunications network when the line encounters a busy condition and is not answered after a pre-determined number of ringing cycles. Any toll charges generated by the use of this feature will be charged to the Call Forwarding customer.

B. Feature Descriptions (Continued)

9. Caller ID Services

a. ~~Calling Name Delivery~~ - Allows customers to receive and display the Calling Party Name on incoming calls. When a Calling Name Delivery equipped line is on-hook, the calling party's name associated with the calling access line is transmitted across the line during the silent interval between the first and second ring. Calling Name Delivery subscribers must provide and connect their own compatible customer premises equipment to display the calling name transmission.

b. Calling Number Delivery - Allows the transmission of Calling Party Number to the subscriber's access lines. When a Calling Number Delivery equipped line is on-hook, Calling Party Number is transmitted across the line during the silent interval between the first and second ring. Calling Number Delivery subscribers must provide and connect their own compatible customer premises equipment (CPE) to process the Calling Party Number transmission.

c. Call Waiting ID - Allows the customer to receive and view the Calling Name and/or Number for an incoming call while conducting a call. This feature allows the customer to identify the waiting caller before choosing to answer the call. The following limitations apply:

In order to subscribe to Call Waiting ID, the customer must also subscribe to Calling Name and/or Number Delivery and connect their own compatible customer premises equipment (CPE) in order to view calling party name and/or number.

Call Waiting ID Service will be provided in connection with individual and multiline residence and business lines. Although this service is available on line-side PBX trunk connections, it is not available on trunk-side PBX connections, such as DID. In addition, Pay Telephones Services are excluded from this tariff offering.

d. Caller ID General Regulations - Caller ID Service is available in connection with individual and multiline residence and business lines only, where technically feasible. Although this service is available on line-side PBX trunk connections, it is not available on trunk-side PBX connections, such as DID. In addition, party lines, IMTS service, pay telephone services are excluded from this tariff offering.

Caller ID Service is offered on a subscription basis which requires the customer to order the service. Where Caller ID Service is available, any calling party, whether they subscribe to Caller ID or not, has per call blocking capability, unless that customer is calling from a pay telephone or trunk-side PBX service.

The blocking of Caller ID Service will not be provided on calls originating from a pay telephone or trunk-side PBX service.

Per-line blocking will be offered at no charge to a particular customer if the Commission receives from the customer written certification that the customer has a compelling need for per-line blocking.

Per-line blocking will be offered at no charge to a particular customer if the Commission receives from the customer written certification that the customer has a compelling need for per-line blocking or if the customer contacts the Company directly. Customers who request per-line blocking also have the ability to unblock their line on a per-call basis by dialing an access code (*82 or 1182) immediately prior to placing the call. The *82 (or 1182) access code deactivates per-line blocking and delivers the calling party information for that call. Per-line blocking is automatically reactivated when the customer terminates the call.

9. Caller ID Service (continued)

d. Caller ID General Regulations (continued)

Any Company calling party may prevent the delivery of calling party information to the called party by dialing an access code immediately prior to the placing a call. The access code activates per-call blocking. Per-call blocking is available at no charge.

If the calling party activates blocking, the calling party information will not be transmitted across the line. Instead, Caller ID subscribers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID subscriber that the calling party chose to block delivery of calling party information.

The Company shall not be liable for any and all claims for damages caused, or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a telephone number which the calling party has requested to be omitted from the telephone directory or the disclosing of such calling party information to any person.

The Company shall not be liable for any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a telephone number.

The Company shall not be liable for any and all claims for damages caused by a telecommunications utility failure to transmit the privacy indicator to the called party when such indicator has been passed to the telecommunications utility by the Company.

When a call is placed from a telephone number associated with a non-published listing, the number may be disclosed if the called party has equipment to display calling party information.

B. Feature Descriptions (continued)

9. Caller ID Service (continued)

d. Caller ID General Regulations (continued)

A person may not use Caller ID Service to compile and sell specific local call information without the affirmative consent or approval of the originating telephone customer. This restriction does not prohibit the Caller ID subscriber from: (1) verifying network performance or testing the provision of caller identification service; (2) compiling, using, and disclosing aggregate Caller ID information; or (3) complying with applicable law or legal process.

e. Caller ID - Feature Interaction

Caller ID information will not be displayed under the following conditions:

- If the called party is off-hook
- If the called party answers during the first ring interval.

Caller ID is not available with distinctive ringing services having a silent interval length insufficient for delivery of calling party information.

Identification of specific stations or extensions served by CPE is not possible. The main directory number of the CPE will be displayed.

Caller ID will not be displayed for calls made on a multiparty line. The called party will receive an "unavailable" indicator.

Caller ID will be terminated and displayed for calls made from another central office only if it is linked by appropriate facilities.

When Caller ID Service is provided in connection with line-side PBX trunk connections, the Company makes no guarantee that the calling party information will be delivered in a manner such that the customer's equipment will be able to transmit that information to the stations or extensions served by the CPE.

X. ADVANCED CALLING SERVICES (continued)

B. Feature Descriptions (continued)

9. Caller ID Service (continued)

e. Caller ID - Feature Interaction (continued)

Customers subscribing to Caller ID services in conjunction with line-side PBX connections are responsible for the provision of compatible CPE which will receive, translate, display and/or store the transmitted data. The installation, repair, and technical capability of that equipment to function in conjunction with Caller ID services on line-side PBX connections will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any damage to the customer's equipment due solely to the transmission of the calling party's information or for any incompatibility of the customer's equipment to perform satisfactorily with the information transmitted.

f. State and Local Government Undercover Operations Special Service Arrangement

The parameters of the special service arrangement are as follows: State and local government entities authorized to conduct undercover or surreptitious civil or criminal investigations, where the existence or conduct of an investigation or the identity of the investigator may be disclosed or compromised by Caller ID Services, may be eligible to receive at no charge, for a period not to exceed 90 calendar days, local exchange business, key or line-side PBX access service lines to be used only in connection with a service arrangement that will mask the identity of the calling party. In addition, any nonrecurring charges and End User Common Line Rate Element associated with the access lines will be waived. All monthly and nonrecurring charges, including the End User common Line Rate Element charge will begin to accrue for each access line on the 91st calendar in-service day.

The services provided under the special service arrangement will be offered only in exchanges where Caller ID Service is available.

9. Caller ID Service (continued)

f. State and Local Government Undercover Operations Special Service

Arrangement

Each state or local government entity must request and receive sponsorship, on an individual access line basis, from the Texas Attorney General for access or subscription to this special arrangement. The special service arrangement must be requested by the Texas Attorney General on behalf of any state or local government entity which, in the judgment of the Texas Attorney General, is authorized to conduct undercover or surreptitious civil or criminal investigations.

For the purpose of requesting the special service arrangement, the State Attorney General will designate a representative that will act as liaison between all state and local government entities and PLTC. PLTC will also designate a representative to coordinate with the State Attorney General representative. In addition, PLTC will establish internal procedures to administer requests for the special service arrangement.

The total number of in-service local exchange access lines provided for under the special arrangement for use by all state and/or local government entities in the conduct of undercover or surreptitious civil or criminal investigations cannot exceed 10 (ten) at any given time.

The Texas Attorney General will be responsible for ensuring that the services provided at no charge under the special service arrangement are to be used only by authorized representative(s) of state and/or local government entities and only in the conduct of undercover or surreptitious civil or criminal investigations.

X. ADVANCED CALLING SERVICES (continued)

B. Feature Descriptions (continued)

10. Safety Line - allows residential and business subscribers to place a call to a pre-assigned number without dialing, when the telephone set remains off-hook for a given interval of time. The subscriber also has the option of originating calls normally. To override the pre-assigned number, the subscriber must begin dialing within the office-wide administrable time period. If dialing has not started before the time period expires, the call is routed to a pre-assigned intercom code, local number or toll directory number. The pre-assigned number is administrable on a line basis. Applicable toll charges apply for calls routed to toll numbers.

11. Distinctive Ring

a. Distinctive Ring service permits a customer to establish up to two telephone numbers on the same access line and to distinguish calls to each number by distinctive incoming ring patterns. The billing telephone number is the "master" number and the other telephone number is the "dependent" number. The standard ringing pattern is provided for the master number while a distinctive ringing pattern is provided for the dependent number.

b. Distinctive Ring service is available to single line residence and business customers where facilities are available. Distinctive Ring is not available with Pay Telephone Access Service, hunting arrangements, foreign exchange and certain other services.

c. When a Distinctive Ring customer subscribes to any Call Forwarding feature, and forwards calls placed to the master number, all calls to the dependent number will automatically be forwarded as well.

d. When a Distinctive Ring customer subscribes to Call Waiting, incoming calls to the master number will activate the standard Call Waiting tone. Incoming calls to the dependent number will activate a distinctive Call Waiting tone.

X. ADVANCED CALLING SERVICES (continued)

B. Feature Descriptions (continued)

11. Distinctive Ring (continued)

e. A directory listing is furnished per telephone number. When a customer requests the dependent number be nonpublished, no nonpublished directory listing charge shall apply. However, if the master number and the dependent number are nonpublished, the appropriate monthly rate, in accordance with the provisions of Section 7 of this tariff, is applicable to the master number.

f. Service Charges outlined in Section 5 of this tariff are applicable for telephone number changes per telephone number.

g. Rates and charges for Distinctive Ring, as outlined hereinafter, apply in addition to the established rates and charges for the access line (master number) and any other services with which Distinctive Ring service is associated.

12. Terminating Call Management

a. Terminating Call Management (“TCM”) service provides the subscriber with the ability to screen callers prior to terminating the call at the subscriber’s line. The TCM service creates a “known caller” list for each subscriber. Calls that are received by an unknown party (the number is unavailable) or is not on the “known caller” list are intercepted. These callers will hear a message indicating that the number reached does not accept calls from unknown numbers. The message instructs telemarketers to add the called number to their do not call list. Callers will have the option of pressing 1 to stay on the line and connect to the called party. If the caller presses 1, the calling number will be added to the “known caller” list for that subscriber, and the calling party will not encounter the intercept message again.

b. The TCM service maintains a list of blocked callers for each subscriber. If a TCM subscriber receives a call from a blocked caller, the caller will be notified that the number they have dialed does not accept calls from the calling party’s telephone number. The subscriber has administrative rights to modify the blocked caller list at any time, or to turn the blocked caller list on and off.

c. This service integrates a Do Not Disturb feature that allows a subscriber to define a time period during which incoming calls can be restricted. Incoming calls can be completed during the restriction period if the calling party inputs a specific override code.

XI. 900/976 CALL RESTRICTION

A. General

1. 900/976 Call Restriction is a central office service which allows a customer to restrict certain outgoing local and long-distance calls from their exchange access line. Call Restriction precludes completion of calls placed by dialing numbers preceded by 1+900 or 976. These calls are also referred to as pay-per-call information services. Calls placed to 976 numbers using the Long Distance Message Telecommunications Network (i.e., 1+976 or 1+(NPA)+976), may not be screened by the Cooperative and may not be included in Call Restriction service.

2. Calls placed to restricted numbers from an access line equipped with Call Restriction service will be directed to a central office announcement where available.

3. Call Restriction service requires special facilities. In areas where these special facilities are not available, all access to pay-per-call information services will be blocked.

4. Call Restriction is offered only in conjunction with Residence single party and Business exchange access line or trunk service.

5. The minimum contract period for this service is one month.

6. With the exception of disconnection of local exchange service, the General Rules and Regulations of the Cooperative regarding payment for services, as outlined in this tariff, apply to 900 and 976 services.

7. The Cooperative shall be held harmless from any and all losses resulting from the blocking of pay-per-call information services, pursuant to the authority granted in the Public Utility Commission of Texas' Substantive Rule 23.58.

(M)

B. Mandatory Call Blocking

1. Access to pay-per-call information services (i.e., 900 and 976) will be automatically blocked for subscribers to pay telephone services.

2. The Cooperative may elect to block access to pay-per-call information services from a subscriber's line if charges for 1+900 and/or 976 services originating from the customer's line are not paid. The Cooperative will use its normal billing and collection investigation procedures for toll to determine if blocking is necessary.

C. Rates and Charges

A nonrecurring service charge is applicable for each incident of Call Restriction service with the following exceptions:

1. The initial incident of individual Call Restriction service;

2. A customer with Call Restriction service requests a transfer of service and reestablishment of 900/976 Call Restriction on the same service order.

XII. EDUCATIONAL FACILITIES

A. Distance Learning Discounts

Upon submission of an affidavit that complies with the requirements of the Public Utility Commission of Texas' Substantive Rule 26.141, an eligible educational institution, library, or consortia may obtain a 25% discount on the tariffed rate for any tariffed service that is predominantly used for distance learning purposes. The discount shall apply to any tariffed service as may be ordered out of this local exchange tariff or any tariff that the Cooperative concurs or otherwise participates in. For any discount received pursuant to XII.B., following, an eligible school, library, or consortia may apply such discount prior to any discount received under this section.

B. Educational Percentage Discount Rates (E-Rates)

1. Application

The purpose of this section is to establish educational percentage discount rates (E-Rates) in compliance with Public Utility Commission of Texas Substantive Rule 23.107 for services that may be ordered out of this local exchange tariff or any other intrastate tariff in which the Cooperative concurs or otherwise participates.

2. Eligibility

Schools, libraries, and consortia eligible for E-Rates pursuant to 47 Code of Federal Regulations Part 54, subpart F shall comply with the provisions of 47 Code of Federal Regulations part 54, subpart F in order to receive the intrastate E-Rates.

C. Public Entity HC1 Service

1. General

a. This Section applies to intraLATA interexchange 1.544Mbps private circuits purchased by qualified customers as provided for by PURA § 58.253(a).

b. Public Entity HC1 Service covers arrangements that are provided only to qualified customers located within the Cooperative's local exchange service area. Arrangements terminating at another carrier's location or transiting another carrier's territory will be provided pursuant to the regulations, rates, and charges of the other carrier(s) for the portion of the arrangement provided by the other carrier(s).

c. Notwithstanding the restricted availability of these services to certain qualified customers, nothing shall preclude the provisioning of such services at the rates prescribed herein when ordering on behalf of a qualified customer, who will continue to be responsible for payment of all billed amounts.

d. Public Entity HC1 Service provided pursuant to this section may not be shared or resold to other customers except that such services may be used and shared among the entities described in XII.C.1.a, above.

e. A qualified customer may elect the rate treatment provided in this subsection or the discount provided pursuant to Section XII.A of this tariff.

f. Rules and regulations provided in this section of the tariff are in addition to other rules and regulations as stated in this tariff.

g. Qualifying customers currently under existing service arrangements may rollover those arrangements to equivalent services as provided herein without incurring any applicable termination penalties.

h. Public Entity HC1 Service is subject to a twelve month minimum term and subject to termination provisions as provided in Section XII.C.6, as follows.

XII. EDUCATIONAL FACILITIES (continued)

C. Public Entity HC1 Service (continued)

1. General (continued)

i. Public Entity HC1 Service may be interconnected only with jurisdictionally intrastate services, except as otherwise provided in the Cooperative's tariffs. For purposes of this section of the tariff, interconnection of these services to the State of Texas' TEX-AN network is authorized, as well as to the jurisdictionally interstate services of authorized customers.

j. Customers who obtain service under this section who are not qualified customers are subject to having such services disconnected or to being charged standard tariffed rates.

k. In order to qualify for service under this section of the tariff, at least one point of termination of Public Entity HC1 Service must be located on a qualifying customer's premises.

2. Definitions

For purposes of this section of the tariff, the following definitions shall apply.

a. Bit - The smallest unit of information in the binary system of notation.

b. Channel - A communications path between two or more points of termination.

c. Channelize - The process of multiplexing/demultiplexing wider bandwidth or higher speed channels into narrower bandwidth or lower speed channels.

d. Clear Channel Capability - A feature that provides customers with an increase in usable bandwidth by providing unconstrained data streams across the network.

e. Public Entity HC1 Service - An intraLATA dedicated high capacity channel used for simultaneous two-way transmission of serial, bipolar, return-to-zero isochronous digital signals at a transmission speed of 1.544 megabits per second (mbps).

XII. EDUCATIONAL FACILITIES (continued)

C. Public Entity HC1 Service (continued)

2. Definitions (continued)

f. Isochronous - Transmission timing derived from the signal carrying the data (i.e., no timing or clock lead is provided at the customer interface.)

g. Multiplexing - An arrangement that converts a higher bit rate signal to a lower bit rate, or bandwidth signal, or from digital to voice grade channels.

3. Provision of Service

a. Public Entity HC1 Service is available only on a point-to-point intraLATA interexchange basis, except as otherwise authorized herein.

b. Public Entity HC1 Service rates apply:

(1) Per location for service provided between a qualified customer's premises, where the service is wholly within the Cooperative's service territory.

(2) Per location for service provided from a qualified customer's premises in the Cooperative's service territory up to the point of interconnection with the facilities of another carrier. The other carrier's rates and regulations apply to the portion of the services provided by it.

(3) Per location for service provided from a qualified customer's premises in the Cooperative's service territory to an Interexchange Carrier's (IXC) point of presence in the same LATA. The IXC's rates and regulations apply to the portion of the service provided by it.

c. Public Entity HC1 Service rates do not apply when a qualified customer requests only transport mileage and neither terminating location is within the Cooperative's service territory.

d. Customer Premises Equipment is subject to the regulations set forth in this and other of the Cooperative's tariffs.

e. Special Construction charges do not apply to Public Entity HC1 Service.

MISCELLANEOUS SERVICE ARRANGEMENTS

XII. EDUCATIONAL FACILITIES (continued)

C. Public Entity HC1 Service (continued)

4. Optional Services

a. Central Office Multiplexing is an arrangement which converts a Public Entity HC1 Service channel to multiple channels suitable for use with voice grade services. Central Office Multiplexing is only available where necessary capabilities exist.

b. Clear Channel Capability is a feature that provides the customer with an increase in usable bandwidth from 1.344 mbps to 1.536 mbps of an unconstrained data stream across the network. This feature is only available where necessary capabilities exist. Customer equipment must be compatible with this service. Provision of this service may require special routing of the interoffice channel mileage.

5. Surcharge

The Public Entity HC1 Service surcharge compensates the Cooperative for use of the local exchange network when Public Entity HC1 Service is connected to a Private Branch Exchange or equivalent device which is capable of interconnecting the service, or a derived voice-equivalent channel carrying an interexchange private line service, with local exchange service. The surcharge shall apply in accordance with the rules and regulations contained in Section 7.3.1 of the Cooperative's Intrastate Access Services Tariff.

6. Service Termination

The term for Public Entity HC1 Service is one year. Customers who terminate service prior to the expiration of the service term will be charged a termination charge based on the remainder of the term. The termination charge shall equal the number of months remaining in the service term times the monthly rate.

SERVICE CHARGES

XIII. TOLL RESTRICTION SERVICE

A. General

1. Provides for the restriction of access to the long distance telecommunications network to the local exchange service user while permitting the user to dial local service area calls. This arrangement denies all outgoing calls starting with the digits "1" or "0".

2. This service requires special facilities and will be furnished only where such facilities are available.

3. Where available, toll restriction service will be provided for use only on single line and multiline business or residence local exchange access lines.

4. Acceptance of incoming long distance message is not restricted by toll restriction service. The customer accepts full responsibility for the denial of access to the long distance telecommunications network, or the acceptance of any incoming "collect" long distance messages and charges associated therewith and holds the Cooperative free and harmless from any and all liabilities and/or damages which may be alleged or incurred by such denial or acceptance.

5. Where appropriate, the customer shall post a notice at the location of any telephone associated with this service notifying the user that only local calls are to be dialed.

B. Rates and Charges

Per Month

Per Line

A. Toll Restriction (1+ and 0+ Dialing)

XIV. PREPAID LOCAL TELEPHONE SERVICE

A. General

1. Prepaid Local Telephone Service (PLTS) is a telecommunications service assistance program available to eligible residential telephone service subscribers as a one-time option.
2. PLTS is offered in accordance with P.U.C. SUBST. R. 23.40.
3. Regulations contained in this tariff section apply to PLTS, only.
4. Customers subscribing to PLTS will receive the following services:
 - a. Voice grade dial tone residential service;
 - b. mandatory services where offered by the Cooperative, including extended area service (EAS), extended metropolitan service (EMS), or expanded local calling service (ELC);
 - c. tone dialing service;
 - d. access to 911 service;
 - e. access to dual party relay service;
 - f. the ability to report service problems seven days a week;
 - g. access to the Cooperative's business office;
 - h. one primary directory listing;
 - i. toll blocking service, and
 - j. non-published listing service or non-listed service, if offered by the Cooperative, at the customer's option.

B. Explanation of Terms

The following terms when used in this section shall have the following meaning unless the context clearly indicates otherwise:

1. **Basic Local Telecommunications Service** - Includes services listed in subsection A. 4. of this tariff.
2. **Disconnection of telephone service** - The period after which a customer's telephone number is deleted from the central office switch and databases.
3. **Service connection charge** - A charge applied by the Cooperative to connect service to a customer's telephone line after it has been disconnected by the Cooperative.
4. **Service restoral charge** - A charge applied by the Cooperative to restore service to a customer's telephone line after service has been suspended by the Cooperative.
5. **Suspension of telephone service** - The period during which the customer's telephone line does not have dial tone but the customer's telephone number is not deleted from the central office switch and databases.
6. **Toll blocking** - Blocking of a customer's access to toll providers and toll services.
7. **Usage-sensitive blocking** - Blocking of a customer's access to services which are charged on a usage sensitive basis for completed calls. Such services include, but are not limited to, call return, call trace, and auto redial.

C. Eligibility Requirements for PLTS

1. PLTS is available to:

Current or former residential customers, only:

a. Former customers whose application would otherwise be denied due to indebtedness to any dominant certificated telecommunications utility (DCTU) or other telecommunications carrier.

b. Current customers - Residential customers of the Cooperative who have not been disconnected from the network but who have received a notice concerning the availability of PLTS following suspension of service for non-payment for services.

2. PLTS may not be provided to current or former customers who have previously received PLTS from the Cooperative.

3. PLTS is not available for business customers.

4. Procedures for Establishing Eligibility

a. To subscribe to PLTS, current or former customers must request PLTS from the Cooperative during the Cooperative's regular business hours.

b. The Cooperative shall confirm the customer's subscription to PLTS within 24 hours of a customer-initiated inquiry by mailing a confirmation letter explaining the PLTS plan in detail.

1. The customer subscribing to PLTS shall have mandatory toll blocking and usage sensitive blocking, if necessary, placed on the customer's telephone line.

2. The customer subscribing to PLTS shall not place or receive calls, including intraLATA and interLATA long distance or other usage-sensitive services, for which additional charges are billed to the customer's telephone number by the Cooperative, through tariffs or contracts. The PLTS customer shall not subscribe to any services offered by the Cooperative other than those included in PLTS, as defined in subsection A. 4. of this tariff.

E. Rates for PLTS Customers

1. The recurring monthly rates for customers subscribing to PLTS include the applicable residential tariffed rate for services described in subsection A. 4. of this tariff; any tariffed charges for non-listed or non-published service, if offered by the Cooperative and if requested by the customer; and any surcharges and fees authorized by a governmental entity that are billed by the Cooperative. These surcharges include, but are not limited to, 911, subscriber line charge, sales tax, and municipal fees.

2. Nonrecurring rates shall include all appropriate service connection or service restoral charges, which will be applied under the following conditions:

a. Service connection charges

Where a former customer was disconnected from basic local service without a suspension period prior to disconnection, and the customer subsequently subscribes to PLTS, the Cooperative will defer the service connection charge if the former customer subscribes to PLTS within 10 days from the date the Cooperative mails a termination notice that describes PLTS eligibility to that former customer.

XIV. PREPAID LOCAL TELEPHONE SERVICE (Continued)

E. Rates for PLTS Customers (Continued)

2. (Continued)

a. (Continued)

The deferred service connection charge will be due when the PLTS subscriber leaves PLTS service to return to basic local service.

b. Service restoral charges

Where a current customer's service was suspended for non-payment, service restoral charges will be due when the PLTS subscriber leaves PLTS service to return to basic local service.

3. The Cooperative shall not assess late charges on PLTS subscribers.

F. Payments Under PLTS

1. The PLTS subscriber is required to make an initial payment for service. This payment cannot exceed charges for two months of service under the PLTS plan described in this tariff, and any applicable non-recurring service connection or restoral charges.

2. Subsequent monthly recurring payments by the PLTS subscriber shall not exceed the rates for one month of service under PLTS.

3. The due date for subsequent monthly payments for PLTS shall be based upon the Cooperative's regular monthly billing cycle.

4. A PLTS customer may also be required to make payments under the deferred payment plan as described in subsection G. of this tariff.

G. Deferred Payment Plan for PLTS

1. As a condition of receiving PLTS, the Cooperative may require a PLTS applicant to enter into a deferred payment plan for any outstanding debt owed to the Cooperative for the same services previously received under basic local service and now subscribed to under PLTS. The deferred payment plan for PLTS shall not include any outstanding debt for any services that will not be received by the customer under PLTS, including but not limited to, intraLATA and interLATA long distance services.

2. The Cooperative shall determine the amount the PLTS subscriber owes for basic local services previously received and which the customer subscribes to under PLTS. The Cooperative will apply any undesignated partial payment made by the PLTS subscriber prior to PLTS subscription to the amount owed the Cooperative for services previously received under basic local service and to which the customer subscribes under PLTS. The Cooperative will not reallocate undesignated partial payments to amounts yet to be incurred for basic local telecommunications service.

3. If the Cooperative is unable to determine the amount of outstanding debt owed for the services previously received under basic local service and now subscribed to under PLTS, the Cooperative shall not require an applicant to enter into a PLTS deferred payment plan.

4. Monthly payments under the PLTS deferred payment plan will be established as follows:

a. The amount of the monthly payment shall not exceed the greater of \$10 or one-twelfth of the outstanding debt.

b. The initial deferred payment shall be billed beginning with the third billing cycle after initiation of PLTS service and thereafter will be billed on a monthly basis.

XIV. PREPAID LOCAL TELEPHONE SERVICE (Continued)

H. PLTS Subscriber Deposits

1. The Cooperative shall not require a deposit from any applicant for PLTS.

I. Disconnection of PLTS Service

1. Disconnection With Notice

The Cooperative shall disconnect a PLTS subscriber after notice for any of the following reasons:

- a. Failure to comply with the terms of a PLTS deferred payment plan;
- b. Upon conclusion of all periods for which an advance payment has been applied to the PLTS account and when the customer's PLTS account has a zero balance; or
- c. Violation of the Cooperative's rules pertaining to use of PLTS in a manner which interferes with the service of others or for the operation of nonstandard equipment, if a reasonable attempt has been made to notify the customer and the customer has been provided with a reasonable opportunity to remedy the situation.

2. Disconnection Without Notice

a. The Cooperative shall immediately disconnect a PLTS subscriber without notice under the following conditions:

(1). If the PLTS subscriber accrues new billable charges for toll or other services on their telephone bill;

(2). Where a known dangerous condition exists for as long as the condition exists; or

2. Disconnection Without Notice (Continued)

a. (Continued)

(3). Where service is connected without authority by a person who has not applied for the service or who has reconnected service without authority following termination of service.

b. The Cooperative shall send a final notice to a PLTS customer who has been disconnected pursuant to the provisions of this subsection, stating that the customer has been permanently disconnected from PLTS and that the customer shall no longer be eligible for PLTS from the Cooperative. The notice shall also state the terms and conditions that the customer must satisfy before the customer can return to basic local service.

J. Return of PLTS Subscriber to Basic Local Service

1. The PLTS subscriber may return to the Cooperative's basic local service providing that the customer has:

a. paid all outstanding debt in full to the Cooperative, including indebtedness for the carriage charges of interexchange carriers where the Cooperative bills those charges pursuant to tariffs or contracts; and

b. paid all bills for PLTS.

J. Return of PLTS Subscriber to Basic Local Service (Continued)

2. The Cooperative shall notify the PLTS subscriber upon satisfaction of the obligations above that:

a. the customer is eligible to return to basic local service without PLTS restrictions;

b. the customer may request basic local service including toll blocking and or usage-sensitive blocking, if applicable, at the Cooperative's tariffed rate and that such services may be removed at any time upon the customer's request; and

c. the customer must contact the Cooperative to arrange to be returned to basic local service.

3. In addition to the requirements stated in this subsection, in order to return to basic local service the PLTS customer must:

a. Request subscription from the Cooperative for basic local service; and

b. Pay the service restoral fee or service connection charges as described in subsection E. of this tariff, if applicable and assessed by the Cooperative.

XV. NUMBER INTERCEPT SERVICE

A. General

1. Number Intercept Service is a service used when a customer disconnects service or changes their telephone number. Number Intercept Service must be ordered in advance of the customer's telephone number change or disconnection. Calls to the intercepted telephone number are referred to an operator or a recorded message. The caller is provided with the called party's new telephone number, if available. This service is available where resources permit.

2. The General Rules and Regulations Section 3 of this tariff is applicable to the provision of Number Intercept Service.

B. Description

1. This service provides either an operator handled or recorded announcement (the type of recording is based on availability of telephone company resources). The announcement states that the called number has been disconnected or changed. If the number is available, it is given to the caller. The number may not be available, because, for example, it is non-published or the customer left the area without providing a forwarding telephone number.

2. Number Intercept Service is provided free of charge to residential customers for a minimum of thirty days and no longer than ninety days where facilities exist and the threat of telephone number exhaustion is not imminent. Number Intercept Service for single line business customers and the primary listed telephone number for Direct Inward Dial (DID) customers shall be available upon request for a minimum of thirty days or the life of the directory, whichever is larger, at the rates listed below. However, if the threat of telephone number exhaustion becomes imminent for a particular central office, the company may re-issue a disconnected number prior to the expiration of the directory but no earlier than 30 days after the disconnection of the business telephone number.

XVI. 811 DIALING SERVICE

A. General

811 Service is a three-digit abbreviated local dialing arrangement that allows local exchange end-users to reach the provider(s) of the state's One Call Notification system (811 Customer). 811 Service is used by the One Call Notification system to provide advance notice of excavation activities to underground facility operators pursuant to Federal Communications Commission's Sixth Report and Order (FCC 05-59) in CC Docket 92-105.

811 Service determines the central office serving the calling party, converts the dialed digits to a Customer provided designated Routing Telephone Number (RTN) and routes the call over the public switched telephone network utilizing Advanced Intelligent Network platforms and features.

B. Regulations

In addition to the following rules and regulations, the Rules and Regulations in Section 3 of the Cooperative's Member Services Tariff shall also apply.

1. 811 Service is offered subject to the availability of facilities and is not available for resale.
2. There can be only one 811 Customer for each stand-alone, host, or remote central office NPA-NXX serving area. The Cooperative will route calls based on the serving central office.
3. The Customer provided designated RTN must be a toll-free number to ensure that toll charges are not incurred by the end-user.
4. 811 Service can be accessed only by end-users who subscribe to the Cooperative's local exchange service, and by end-users who obtain service from an entity that utilizes the Cooperative's local switching to provide dial tone service to its end-users.

XVI. 811 DIALING SERVICE (Cont'd)

B. Regulations (Cont'd)

5. 811 Service will not complete calls dialed using 1+, 0+, 0-operator assisted, 101XXXX, or inmate calls. 811 calls are not permitted where local calling is restricted.

6. The Customer is responsible for informing all local exchange service providers operating within its designated geographical area of any call centers it establishes. Any change to the terminating number(s) is the customer's responsibility. A 60-day written notice is required for any planned number change to ensure that timely number translations occur at each Central Office.

7. 811 Service does not include operator assisted calls, and will only be available to PBX and Key switching system when those systems have been correctly programmed. The Cooperative does not undertake to perform nor shall it be responsible for such programming.

8. Caller ID information from the originating number is not provided to the 811 Customer on a real-time basis.

9. The Cooperative will make every effort to route 811 calls to the appropriate call center(s); however, it will not be held responsible for routing mistakes and errors, interruptions of service, or intervening Acts of God that interfere with telephone service and/or with routing. The Cooperative's obligation under 811 applies solely to the transmission of the call and ends upon call completion to the Customer-provided designated RTN. The Cooperative reserves the right to discontinue the service, if interruption of 811 is necessary to prevent or protect against fraud or otherwise protect Cooperative personnel, facilities or services.

10. 811 Service is provided solely for the benefit of the Customer. The provision of such service shall not be interpreted, construed, or regarded as being for the benefit of or creating any obligation toward, or any right of action on behalf of, any third person or other legal entity, including end users of the Cooperative or any providers of telecommunications service.

XVIII. DIRECTORY ASSISTANCE SERVICE

N

A. General

1. The Cooperative furnishes Directory Assistance Service whereby customers may request assistance in determining local and national directory information.

2. The rates set forth below apply to calls from customers whose requests for local or intraLATA directory information are provided by the Cooperative and billed to its subscribers.

B. Regulations

1. Customers may make two listing requests per call at no additional charge. Each additional listing request after the first two will be charged an additional Directory Assistance charge. There is a maximum of ten requests per call. Customers desiring more than one listing per call should inform the Directory Assistance operator at the beginning of the call.

2. Where the customer places a call to the Directory Assistance attendant via an operator or has Directory Assistance charges billed to a telephone calling card, or a telephone number other than the originating number, the call shall be considered alternately billed. If dial facilities are not available, calls placed to Directory Assistance via an operator shall be considered as Customer dialed.

3. No credit will be given for requested telephone numbers that are nonpublished or nonlisted. Likewise, no credit will be given for requested telephone numbers that are not found in the directory.

4. Customers whose physical or visual disabilities prevent them from using the telephone directory are also excluded from Directory Assistance charges. Such customers must provide the Cooperative with a certificate signed by a physician or issued by any agency recognized by the state as having the authority to certify such disabilities.

5. Calls placed from Pay Telephone Exchange Access Service will be given a maximum of two requests per call.

**CONNECTION WITH CERTAIN CUSTOMER-PROVIDED
EQUIPMENT AND FACILITIES**

I. GENERAL

TM

A. Application of Tariff

This Section contains regulations, rates and charges, for the connection of certain customer-provided equipment and facilities to the Cooperative's telecommunications network.

In addition to the provisions of this tariff Section, the General Rules and Regulations of the Cooperative as set forth in this Member Services Tariff are also applicable to all services and facilities of the Cooperative furnished for connection with customer-provided equipment and facilities as specified in this Section.

B. Basis of Connection

1. Customer-provided terminal equipment, protective circuitry, and communications systems may be used with the facilities furnished by the Cooperative for telecommunications services as provided in the following paragraphs of this Section and Section 3 of the Member Services Tariff. In all such cases the customer-provided terminal equipment or communications systems will be so constructed, maintained and operated as to work satisfactorily with the facilities of the Cooperative.

2. Satisfactory performance of the telecommunications network requires continuing functional compatibility of the network control signals and the switching equipment involved. To assure such continuing compatibility, network control signaling in the furnishing of telecommunications service shall be performed by equipment furnished, installed and maintained by the Cooperative unless the customer-provided terminal equipment or protective circuitry meet the requirements of Part 68 of the FCC Rules and Regulations.

3. Customer-provided terminal equipment or communications systems that serve a location which the Cooperative considers impracticable to serve because of hazard or inaccessibility may be connected with telecommunications service only by means of connecting equipment furnished by the Cooperative unless the customer-provided terminal equipment, communications systems, protective circuitry, or premise wiring meets the requirements of Part 68 of the FCC Rules and Regulations as specified in this Section, Part II.

I. GENERAL (Continued)

C. Responsibility of the Cooperative

1. The Cooperative shall not be responsible for the installation, operation or maintenance of any customer-provided terminal equipment, protective circuitry, or communications systems. Telecommunications service is not represented as adapted to the use of customer-provided terminal equipment or systems. Where such are connected to Cooperative facilities, the responsibility of the Cooperative shall be limited to the furnishing of facilities suitable for telecommunications service; subject to this responsibility the Cooperative shall not be responsible for (1) the through transmission of signals generated by the customer-provided equipment, protective circuitry, or systems (2) or for the quality of, or defects in, such transmission, or (3) the reception of signals by customer-provided equipment, protective circuitry or systems.

N
N

2. The Cooperative will not be responsible to the customer or otherwise, if changes, as reasonably required in the operation of its business and which are not inconsistent with Part 68 of the FCC Rules and Regulations, in the Cooperative's communications facilities, equipment, operations or procedures renders the customer-provided terminal equipment, protective circuitry, or communications system obsolete or require modification or alteration of such equipment. The Cooperative will give at least 90 days notice in writing if such changes can reasonably be expected to occur, allowing the customer an opportunity to maintain uninterrupted service.

TM
TM

D. Liability of the Cooperative

1. The Cooperative will not be responsible for any loss or damage, nor for any impairment or failure of the service, arising from or in connection with the use of facilities of customers and not caused solely by the negligence of the Cooperative.

N

2. The Cooperative will not be liable for damages arising out of injuries to persons or property from voltages or currents transmitted over the facilities of the Cooperative caused by customer-provided terminal equipment or protective circuitry.

EQUIPMENT AND FACILITIES

I. GENERAL (Continued)

E. Notification to the Cooperative

The customer shall give proper notice of intention to the Cooperative before any connection of terminal equipment or protective circuitry is made, providing to the Cooperative the line to which such connection is to be made, the FCC Registration Number and Ringer Equivalence of the registered terminal equipment or registered protective circuitry so as to comply with the FCC Rules and Regulations in accordance with Part III, A, 5 of this Section. The customer shall give notice to the Cooperative upon final disconnection of such equipment or circuitry from the particular line(s).

F. Responsibility of the Customer

1. The customer indemnifies and saves the Cooperative harmless against claims for infringement of patents arising from combining such equipment or systems with, or using it in connection with, facilities of the Cooperative; and against all other claims arising out of any act or omission of the customer in connection with facilities provided by the Cooperative. See Save Harmless Agreement Section 13, Exhibit A.

2. The customer must provide all the electrical power necessary for the operation of customer-provided communications systems equipment and associated lines to the point of interconnection.

3. The customer shall provide premises wiring that is installed in compliance with Part 68 of the FCC Rules and Regulations and the National Electric Code.

For installation of premise wiring other than residential one and two-line service, wiring must comply with regulations as provided under this Section, Part II, Installation of Premise Wiring, and Part 68 of the FCC Rules and Regulations.

4. Where telecommunications service is available under this tariff for use in connection with customer-provided terminal equipment, protective circuitry, or communications systems, the operating characteristics of such equipment or system shall be such as not to interfere with any of the services offered by the Cooperative. Such use is subject to the further provisions that the customer-provided equipment or system does not endanger the safety of Cooperative employees or the public; damage, require change in or alteration of, the equipment or other facilities of the Cooperative; interfere with the proper functioning of such equipment or facilities; impair the operation of the telecommunications system or otherwise injure the public in its use of the Cooperative's service.

F. Responsibility of the Customer (Continued)

5. Upon suitable notification to the customer, the Cooperative may make such tests and inspections as may be necessary to determine that the above requirements are being fulfilled in connection with the installation, operation and maintenance of customer-owned facilities or equipment. The Cooperative may interrupt the connection if at any time such action should become necessary in order to protect any of its services because of departure from these requirements.

6. Upon notice from the Cooperative that the customer-provided terminal equipment or protective circuitry is causing or is likely to cause hazard or interference to the telephone network the customer shall make such changes as shall be necessary to remove or prevent such hazard or interference.

However, where proper notice is not practicable, the Cooperative may temporarily discontinue service immediately if such action is deemed reasonable under the circumstances. The customer will be notified of such temporary discontinuance and afforded an opportunity to correct the conditions causing the temporary discontinuance.

The customer shall be responsible for the payment of Cooperative charges, as specified below, for visits by the Cooperative to the customer's premises where a service difficulty or trouble report results from customer-provided facilities whether or not such equipment or systems are legally connected in accordance with the terms of this Section.

7. Customers providing their own equipment or facilities shall reimburse the Cooperative for damages to facilities or equipment of the Cooperative caused by the negligence or willful act of the customer or resulting from improper use of the Cooperative facilities, or due to malfunction of any facilities or equipment provided by other than the Cooperative.

H. Violation of Regulations

When any customer-provided equipment, protective circuitry or communications system is used with telecommunications service in violation of any of the provisions in this tariff, the Cooperative will take such immediate action as necessary for the protection of its services, and will promptly notify the customer of the violation. The customer shall discontinue such use of the equipment or systems or correct the violation and shall confirm in writing to the Cooperative within 10 days, following the receipt of written notice from the Cooperative, that such use has ceased or that the violation has been corrected. Failure of the customer to discontinue such use or to correct the violation and to give the required written confirmation to the Cooperative within the time stated above shall result in termination of the customer's service until such time as the customer complies with the provisions of the tariff.

I. Lawfully Connected Equipment

1. Terminal equipment and/or protective circuitry lawfully connected directly to the Cooperative's exchange facilities in each exchange as of October 27, 1977, where compatible, may continue to be connected for the life of the equipment in the same or a compatible exchange without being registered, unless subsequently modified.

2. Entire PBX or Key telephone systems, including their equipment, premise wiring and protective apparatus (if any), directly connected to the Cooperative's exchange facilities in each exchange, on June 1, 1978, may remain lawfully connected to the telephone network for the life of the equipment without being registered, unless subsequently modified.

3. Installations of PBX or Key telephone systems including additions to existing systems, made before January 1, 1980, without being registered, may remain lawfully connected for life without being registered, unless subsequently modified provided that:

- a. any premises wiring added conforms to the Part 68 Rules and Regulations,
- b. any equipment added is of a type that was directly connected to the telephone network as of June 1, 1978.

4. Changes to PBX or Key telephone systems covered in Paragraph 2 and 3 above, may only be made by the manufacturer of the PBX or Key telephone system, or a representative authorized and trained by the manufacturer.

5. Terminal equipment and protective circuitry of a type lawfully connected directly to the Cooperative's exchange facilities in each exchange as of October 17, 1977, where compatible, was allowed to be connected thereafter in the same or compatible exchange until July 1, 1979, at which time all terminal equipment and protective circuitry, other than terminal equipment and protective circuitry covered in Paragraph I-1 above, must be registered in accordance with Part 68 of the FCC Rules and Regulations.

6. PBX or Key telephone systems of a type lawfully connected directly to the Cooperative's exchange facilities in each exchange as of October 17, 1977, where compatible, were allowed to be connected after June 1, 1978, in the same or compatible exchange until January 1, 1980, at which time all PBX or Key telephone systems covered in Paragraph I, 2 and 3 above, must be registered in accordance with Part 68 of the FCC Rules and Regulations. All premises wiring must conform to rules specified in Part 68 of the FCC Rules and Regulations. Changes to PBX or Key telephone systems covered in this paragraph may only be made by the manufacturer of the PBX or Key telephone system, or a duly authorized agent of the manufacturer.

7. Terminal equipment, protective circuitry, and PBX or Key telephone systems, of a type not lawfully connected directly to the Cooperative's exchange facilities in each exchange on October 17, 1977, where compatible, may be directly connected after July 1, 1979, in the same or a compatible exchange only if the customer-provided terminal equipment, protective circuitry or PBX or Key telephone system has been registered in accordance with Part 68 of the FCC Rules and Regulations.

8. PBX or Key telephone systems of a type lawfully connected directly to the Cooperative's exchange facilities in each exchange as of October 17, 1977, or registered in accordance with Part 68 of the FCC Rules and Regulations, and are presently connected to the Cooperative's exchange facilities by protective apparatus, may remove such protective apparatus and connect directly if the following conditions are met:

- a. Any premises wiring whose classification is changed thereby is qualified as if newly installed under Part 68 of the FCC Rules and Regulations.

I. GENERAL (Continued)

I. Lawfully Connected Equipment (Continued)

8. (Continued)

b. All equipments in the system are of a type directly connected to the telephone network as of October 17, 1977, or are registered in accordance with Part 68 of the FCC Rules and Regulations.

9. Terminal equipment not registered nor grandfathered in accordance with Part 68 of the FCC Rules and Regulations may be connected to the network pursuant to the tariff provisions in effect prior to October 17, 1977, requiring customer-provided protective circuitry registered in accordance with Part 68 of the FCC Rules and Regulations.

10. Modifications to systems and installations involving unregistered equipment are covered as follows:

- a. The use of other than fully-protected premise wiring is considered a modification under Part 68 of the FCC Rules and Regulations. As an exception to the general requirement that no modification is permitted to unregistered equipment whose use is permitted under Part 68, certain modifications are authorized herein.
- b. Other than fully-protected premises wiring may be used if it is qualified in accordance with the procedures and requirements as specified in this Section, Part II. B. Since there is no registrant of unregistered equipment, the training and authority required by the above referenced paragraph will have to be received from the equipment's manufacturer.

I. GENERAL (Continued)

I. Lawfully Connected Equipment (Continued)

10. (Continued)

- c. Existing separate, identifiable and discrete protective apparatus may be removed, or replaced with apparatus of lesser protective function, provided that any premises wiring to which the telephone network is thereby exposed conforms to Paragraph b. above. Minor modifications to existing unregistered equipments are authorized to facilitate installation of premises wiring, so long as they are performed under the responsible supervision and control of a person who complies with the requirements specified in Part II, B, below. Since there is no registrant of unregistered equipment, the training and authority required by Part II, B, will have to be received from the manufacturer of the equipment so modified.

II. INSTALLATION OF PREMISES WIRING

Premises wiring connects separately-housed equipment entities or system components to one another, or connects an equipment entity or system component with the telephone network interface, located at the customer's premises and not within an equipment housing.

A. Fully Protected Premises Wiring

- 1. Fully protected premises wiring is premises wiring which is either:
 - a. No greater than 25 feet in length (measured linearly between the points where it leaves equipment or connector housings) and registered as a component of and supplied to the user with the registered terminal equipment or protective circuitry with which it is to be used. Such wiring shall either be pre-connected to the equipment or circuitry, or may be so connected by the user (or others) if it is demonstrated in the registration application that such connection by the untrained will not result in harm, using relatively fail-safe means.

II. INSTALLATION OF PREMISES WIRING (Continued)

A. Fully Protected Premises Wiring (Continued)

1. Fully protected premises wiring is premises wiring which is either:
(Continued)

b. A cord which complies with the previous paragraph and which is extended once by a connectorized FCC-registered extension cord which itself complies with the previous subsection. Extension cords may not be used as a substitute for wiring which for safety reasons should be affixed to or embedded in a building's structure.

c. Wiring located in an equipment room with restricted access provided that this wiring remains exposed for inspection and is not concealed or embedded in the building's structure, and that it conforms to Paragraph B below.

d. Electrically behind registered (or grandfathered) equipment, system components or protective circuitry which assure that electrical contact between the wiring and commercial power wiring or earth ground will not result in hazardous voltages or excessive longitudinal imbalance at the telephone network interface.

2. Protected Premises Wiring Requiring Acceptance Testing for Imbalance:

Premises wiring which is electrically behind registered (or grandfathered) equipment, system components or circuitry which assure that electrical contact between the wiring and commercial power wiring will not result in hazardous voltages at the telephone network interface.

3. Unprotected premises wiring is all premises wiring other than described above.

II. INSTALLATION OF PREMISES WIRING (Continued)

B. Other Than Fully-Protected Premises Wiring

1. Types of Wiring Authorized:

- a. Between Equipment Entities-- Unprotected premises wiring, and protected premises wiring requiring acceptance testing for imbalance, may be used to connect separately-housed equipment entities to one another.
- b. Between an Equipment Entity and the Network Interface(s)-- Fully-protected premises wiring shall be used to connect equipment entities to the telephone network interface unless the Cooperative is unwilling or unable to locate the interface within twenty-five feet of the equipment entity on reasonable request. In any such case, other than fully-protected premises wiring may be used if otherwise in accordance with these rules.
- c. Hardware Protection as Part of the Cooperative's Facilities-- In any case where the Cooperative chooses to provide (and the customer chooses to accept, except as authorized in Part 68 of the FCC Rules and Regulations) hardware protection on the network side of the interface(s), the presence of such hardware protection will affect the classification of premises wiring under Part 68 of the FCC Rules and Regulations for the purposes of this Section.

2. Installation Personnel

Operations associated with the installation, connection, reconfiguration and removal (other than final removal of the entire premises communications system) of other than fully-protected premises wiring shall be performed under the supervision and control of a supervisor, as defined in Paragraph 3, below. The supervisor and installer may be the same person.

B. Other Than Fully-Protected Premises Wiring (Continued)

3. Supervision

Operations by installation personnel shall be performed under the responsible supervision and control of a person who:

- a. Has had at least six months of on-the-job experience in the installation of telephone terminal equipment or of wiring used with such equipment;
- b. Has been trained by the registrant of the equipment to which the wiring is to be connected in the proper performance of any operations by installation personnel which could affect that equipment's continued compliance with Part 68 of the FCC Rules and Regulations;
- c. Has received written authority from the registrant to assure that the operations by installation personnel will be performed in such a manner as to comply with these rules;
- d. Or, in lieu of paragraphs a. through c. of this Section, is a licensed professional engineer in the jurisdiction in which the installation is performed.

4. Affidavit

The supervisor responsible for customer-provided equipment shall prepare and furnish the Cooperative a notarized affidavit ten days in advance of the installation of the premise wiring. This affidavit will contain:

- a. Supervisor's qualifications
- b. Supervisor's agency authority
- c. Dates the wiring installation will take place
- d. The affiliation of the installation personnel
- e. National and local codes to which installation conforms

4. Affidavit (Continued)

- f. Manufacturer and a brief description of the wire that will be used
- g. Conformance with the wire to recognized standard
- h. The dates when acceptance testing for imbalance will take place

Such affidavit is also to be kept with the customer-provided equipment at all times.

5. Workmanship and Material Requirements

Wiring shall be installed so as to assure that there is adequate insulation of telephone wiring from commercial power wiring and grounded surfaces. Wiring is required to be sheathed in an insulation jacket in addition to the insulation enclosing individual conductors unless located in an equipment enclosure or in an equipment room with restricted access; it shall be assured that this physical and electrical protection is not damaged or abraded during placement of the wiring. Any intentional removal of wiring insulation or a sheath for connections or splices shall be accomplished by removing the minimum amount of insulation necessary to make the connection or splice, and insulation equivalent to that provided by the wire and its sheath shall be suitably restored, either by placement of the splices or connections in an appropriate enclosure, or equipment rooms with restricted access, or by using adequately-insulated connectors or splicing means.

6. Specifications as to types of wiring, building and electrical codes, limitations on electrical signals, acceptance testing for imbalance, extraordinary procedures, etc., are to be complied with as specified in Part 68 of the FCC Rules and Regulations.

III. CUSTOMER-PROVIDED TERMINAL EQUIPMENT

A. Connection of FCC Registered Equipment

FCC registered terminal equipment, protective circuitry, data equipment or communications systems, excluding pay telephones, may be directly connected to the Cooperative's exchange facilities in accordance with 1. through 8. following. T

1. Customer-provided terminal equipment, protective circuitry, data equipment or communications systems, directly connected to exchange facilities must be registered in accordance with part 68 of the FCC Rules and Regulations:

2. Customer-provided terminal equipment, protective circuitry, data equipment, or communications systems may not be directly connected to party line service.

3. Customer-provided terminal equipment, protective circuitry, data equipment or communications systems connected to exchange facilities, (except for Cooperative-provided line test devices) shall be made through standard plugs and standard jacks so as to allow for easy and immediate connection or disconnection. Standards for plugs and jacks are as specified in Part 68 of the FCC Rules and Regulations.

4. One Cooperative-provided device with line test capability may be connected to the line at the discretion of the Cooperative.

III. CUSTOMER-PROVIDED TERMINAL EQUIPMENT

A. Connection of FCC Registered Equipment

5. Customers desiring to connect terminal equipment, protective circuitry, data equipment, or communications systems, to the Cooperative's exchange facilities, before such connection is made, are required to notify the Cooperative of:

- a. The FCC Registration Number, and
- b. The Ringer Equivalence Number of the registered terminal equipment or registered protective circuitry, and;
- c. The line number or directory number to which the terminal equipment, protective circuitry, or data equipment will be connected.
- d. Other such information that may be required to assure the compatibility of the connected equipment.

The Cooperative will maintain a written record of the information provided by the customer. A customer who fails to notify the Cooperative of such connection or is otherwise in violation of Part 68 of the FCC Rules and Regulations will be subject to disconnection of said equipment.

MEMBER SERVICES TARIFF
FOREIGN EXCHANGE SERVICE

I. GENERAL

Foreign exchange service is exchange service furnished to a customer from an exchange other than the one in which he is located and served.

Foreign exchange service is not in accordance with the general plan of furnishing telephone service and will be furnished only under special conditions where the service is warranted by the circumstances and if satisfactory arrangements can be made where a connecting company is involved.

The Cooperative is not obligated to furnish such service, particularly where it involves undue expense or impairment of the service furnished the general public.

A. Provision of Service

Foreign exchange service is furnished only in connection with one party (individual line), key system trunk or PBX trunk service. The customer must have existing individual line, key system, or PBX trunk service from the local exchange at the same location where the foreign exchange service is to be installed.

Extension stations may be connected to foreign exchange service on the same premises, provided transmission and signaling conditions permit. Such service will be provided at applicable rates for local extension station service as listed elsewhere in this tariff.

All service and equipment other than the foreign trunks and associated excess mileage is subject to the rates, rules and regulations of the local exchange when both foreign exchange and local exchange trunks are terminated in the same PBX or key system.

Issued: May 15, 1981 Effective: On Approval

TM

PUBLIC UTILITY COMMISSION OF TEXAS APPROVED
FILE T-138-1 BY TARIFF CLERK

MEMBER SERVICES TARIFF

FOREIGN EXCHANGE SERVICE (Continued)

I. GENERAL (Continued)

B. Rates and Charges

1. General

Customers having foreign exchange service are subject to the rates, rules and regulations of the exchange from which such service is provided.

All local service and equipment provided the customer other than the foreign exchange service is subject to the rates, rules and regulations contained in the Member Services Tariff of the Cooperative.

2. Application of Rates

Applicable tariff rates cover only normal conditions where all necessary facilities are available. If facilities are not available and unusual expenditures are involved in their provision, the customer may be required to pay an additional charge to cover the unusual expenditure as provided under Section 6 of this Tariff or enter into a contract for service beyond the initial period or both.

When necessary to modify PBX equipment to terminate foreign exchange trunks, an additional charge may be applied based upon the cost involved in accordance with the provision under Section 6 of this Tariff.

Interexchange channels will be provided in accordance with the regulations for Foreign Exchange Service as shown in the applicable tariffs of the connecting company or companies involved. Interexchange channel mileage is measured on an airline basis from the toll rate center of the foreign exchange to the toll rate center of the local exchange serving the customer.

FOREIGN EXCHANGE SERVICE

II. CONTIGUOUS FOREIGN EXCHANGE SERVICE

TM

A. General

Contiguous Foreign Exchange Service is exchange service extended to a customer residing in an exchange of the Cooperative that is contiguous to another exchange of the Cooperative from which the service is provided. The calling scope of the service is limited to the calling scope of the serving exchange.

B. Provision of Service

1. Construction charges will be required for all new or reinforcing facilities when required to provide this service as covered in Section 6, Part II, B., where facilities are not available or cannot be reasonably provided.

2. This service may be provided in addition to service from the normal serving exchange in which the customer resides.

3. Directory listings for the customer of Contiguous Foreign Exchange Service will be listed in the serving exchange directory listings.

TM

4. Extensions may be provided with this service to any location that would qualify elsewhere in this tariff as an inside extension. Detached extensions may be installed provided the detached extension is not to a residence or business location of another customer or a location not solely owned or operated by the customer contracting for this service.

III. LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE TARIFF

Poka Lambro Telephone Cooperative, Inc. is an issuing carrier of the John Staurulakis, Inc. Issuing Carrier Long Distance Message Telecommunications Service Tariff that is on file with the Public Utility Commission of Texas for the provision of IntraLATA Long Distance Message Telecommunications Service within the State of Texas. This issuing carrier status includes the rates, charges, rules, and regulations applicable for each service provided by the Cooperative in the John Staurulakis, Inc. Issuing Carrier Long Distance Message Telecommunications Service Tariff. The Cooperative makes itself subject to such rates, charges, rules, and regulations until this issuing carrier status is revoked or cancelled. The Cooperative expressly reserves the right to cancel this issuing carrier status when and if it appears such cancellation is appropriate.

The provision of such services by Poka Lambro Telephone Cooperative, Inc., as set forth in the John Staurulakis, Inc. Issuing Carrier Long Distance Message Telecommunications Service Tariff does not constitute a joint undertaking with the customer for the furnishing of any service.

At the option of the Company, Billed Number Screening will be furnished to control instances of fraud associated with billed to third number, station-to-station or person-to-person collect service or in response to a customer request.

The term "Billed Number Screening" denotes an arrangement whereby, at the time of call origination, billed to third number, station-to-station or person-to-person collect calls are screened for customer preauthorized or Company-directed non-acceptance.

IV. CONCURRENCE WITH PRIVATE LINE SERVICES TARIFF
For Interexchange Private Line Services

As of the effective date of this tariff, Poka Lambro Telephone Cooperative, Inc. concurs in the Intrastate Private Line Service Tariff for IntraLATA Private Line Service filed by Southwestern Bell Telephone Company as it exists on the effective date of this tariff. Any in-service Private Line Service provided in accordance with such tariffs as on file with the Public Utility Commission of Texas on the effective date of this tariff, are grandfathered as of the effective date of this tariff. Any change to grandfathered Private Line Services or accounts after the effective date of this tariff will void the grandfathered status of said services and will be considered a new service request. New service requests for special circuits, including foreign exchange circuits, as described in this Member Services Tariff, will be provided by the Cooperative in accordance with the Special Access Service rates, charges, rules, and regulations of the TSTCI Intrastate Access Tariff on file with the Public Utility Commission of Texas.

Issued:

Effective:

MEMBER SERVICES TARIFF

INTERCITY SERVICES

V. CONCURRENCE WITH CONNECTING CARRIER'S WIDE AREA
TELECOMMUNICATIONS SERVICE TARIFFS

As of the effective date of this tariff, Poka Lambro Telephone Cooperative, Inc. concurs in the Wide Area Telecommunications Service Tariff for IntraLATA WATS filed by Southwestern Bell Telephone Company as it exists on the effective date of this tariff. Any in-service Wide Area Telecommunications Services provided in accordance with such tariffs as on file with the Public Utility Commission of Texas on the effective date of this tariff, are grandfathered as of the effective date of this tariff. Any change to grandfathered Wide Area Telecommunications Services or accounts after the effective date of this tariff will void the grandfathered status of said services and will be considered a new service request. New service requests for Wide Area Telecommunications Services will be provided by the Cooperative in accordance with the Special Access Service rates, charges, rules, and regulations of the TSTCI Intrastate Access Tariff on file with the Public Utility Commission of Texas.

VI. INTRASTATE ACCESS SERVICES TARIFF

Poka Lambro Telephone Cooperative, Inc. is an issuing carrier of the TSTCI Intrastate Access Service Tariff that is on file with the Public Utility Commission of Texas for providing Switched Access, Special Access Services and other miscellaneous services within the State of Texas. Poka Lambro Telephone Cooperative, Inc. makes itself subject to such rates, charges, rules and regulations until this issuing carrier status is revoked or canceled. Poka Lambro Telephone Cooperative, Inc. expressly reserves the right to cancel this issuing carrier status when it appears that such cancellation is appropriate.

The provision of such services by Poka Lambro Telephone Cooperative, Inc. as set forth in the TSTCI Intrastate Access Service Tariff does not constitute a joint undertaking with the customer for the furnishing of any service.

|
D

I. PERSONAL PAGING ACCESS LINE SERVICE

A. General

Personal Paging Services are one-way services in which a radio receiver is activated through a base station transmitter by dialing an address code associated with a central office exchange in which the service is offered. Receivers used in connection with Personal Paging Access Line Service are actuated by digital transmission. Each receiver is a small portable radio unit which may be carried on the person of the customer.

1. Availability of Service

a. Due to the inherent characteristics of radio transmission, the Cooperative cannot warrant the range of coverage within the area in which the service is offered, since receivers may be temporarily located in receiving blind spots.

b. Personal Radio Paging Access Line Service is available only in areas equipped to provide this service.

c. The portable radio receiving unit is not included in this offering.

2. Undertaking of the Cooperative

a. The Cooperative undertakes only to transmit a signal for the purpose of actuating a receiver and accepts no responsibility for the transmission of further intelligence.

I. ISDN-PRI SERVICE

A. GENERAL

Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) is a central office based service arrangement that is an alternative for individual access services, such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), 800 Service, Wide Area Telecommunications Service and local business trunks.

B. DEFINITION OF TERMS

1. "B" Channel - A 64 kilobit per second (kbps) channel used for information transfer between users. The "B" channel may be used in conjunction with circuit-switched service.
2. Circuit Switching - A switching technique in which an entire circuit, or in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.
3. "D" Channel - A 64 kbps channel that carries signaling and control for the "B" channel.
4. ISDN-PRI Arrangement - Provides ISDN capabilities between the customer's premises and the serving central office. One Arrangement consists of 23 "B" channels and one "D" channel (23B+D) or 24 "B" channels.
5. PRI Trunk Group - A group of channels which are designated as one of the following:
 - Incoming Exchange Trunk Group
 - Outgoing Exchange Trunk Group
 - Two-Way Exchange Trunk Group
 - WATS Trunk Group
 - 800 Trunk Group
 - Interoffice Tie Group

DIGITAL SERVICES

I. ISDN-PRI SERVICE (Cont'd)

C. DESCRIPTION OF SERVICE

ISDN-PRI is provisioned on a clear channel 1.544 megabit per second (mbps) facility or equivalent and uses the ISDN architecture of 23 "B" channels and one "D" channel or 24 "B" channels to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport. In addition, ISDN-PRI provides the customer with service capabilities and features described in this tariff.

ISDN-PRI provides the capability to transport customer information in the form of circuit-switched voice or data up to 64 kbps over any "B" channel. One "D" channel can control up to twenty PRI Arrangements. In such cases, a single "D" channel in one ISDN-PRI Arrangement handles all signaling and control requirements of multiple ISDN-PRI Arrangements in a specified grouping, allowing supplemental ISDN-PRI Arrangements to consist of 24 "B" channels.

"B" channels can be allocated for specific services, such as DID, DOD, WATS, 800 Service or configure channels to access multiple services on a per-call basis. ISDN-PRI allows the user to have access to the directory number of the calling party. Provision of per-call and line blocking capabilities is a function of the customer premises equipment and the responsibility of the customer. ISDN-PRI will provide the industry standards for National ISDN 1 and National ISDN 2 for PRI with the following exceptions:

- Delivery of Redirection Number for PRI Calling Number Identification,
- Privacy of Redirecting Number for PRI Calling Number Identification,
- Delivery of Redirection Reason for PRI Calling Number Identification.

For reasons of privacy, the Cooperative will not provide Call Trace features with ISDN -PRI service, except to law enforcement officials.

MEMBER SERVICES TARIFF

DIGITAL SERVICES

I. ISDN-PRI SERVICE (Cont'd)

D. CONDITIONS

ISDN-PRI service is available from serving central offices equipped with the necessary "clear channel" facilities to provide ISDN-PRI service. Feature availability and service capabilities are dependent on the facilities and digital technology providing the service.

NI-2 compatible equipment is required for operation. It is the customer's responsibility to obtain and power such equipment.

Toll charges will apply when circuit-switched voice or data calls are completed outside of the customer's local calling area.

All ISDN-PRI Arrangement configurations must have at least one 23B+D for signaling and control functions.

ISDN-PRI service is provided for use by the end-user customer only as a local switched service. ISDN-PRI service is not available for use by Commercial Mobile Radio Carriers, private Mobile Radio Carriers, Interexchange Carriers, VoIP Service Providers or other carriers or providers for use in aggregating or transporting inter-exchange traffic. Such usage is strictly prohibited by this Tariff. Other services designed for and intended for such use are offered by the Cooperative specifically via interconnection agreement or the Cooperative's Access Tariff(s).

This service allows end users to dial the customer's local number(s) to complete local calls to that customer. If the Cooperative discovers that the customer is using this service on a non-retail basis by allowing end users to complete voice communications to third parties outside the customer's local calling area, the Cooperative has the right to terminate the ISDN-PRI retail service five days after notice has been provide via express delivery.

ISDN-PRI interface is comprised of a limited set of standard user network interfaces. The ISDN-PRI customer premises equipment (CPE) must be compatible with the network interface.

Physically, the network is a metallic four-wire telephone loop interface between a switch equipped with ISDN and the network termination (NT2). NT2 customer premises equipment is required for providing physical compatibility in terminating telephone facilities at the customer's premises.

MEMBER SERVICES TARIFF

DIGITAL SERVICES

I. ISDN-PRI SERVICE (Cont'd)

D. CONDITIONS (Cont'd)

Each ISDN-PRI trunk group is equipped with one telephone number. Additional numbers may be ordered in blocks of 10 or 100 per DID Service terms and conditions listed in Section 11.

This tariff does not provide for the transmission of packet data on the "B" or "D" channels.

This service is available from central offices which have the necessary facilities to provide ISDN-PRI service on the standard ISDN network platform. In the event that a customer's local serving office is not so equipped, the Cooperative will provide ISDN-PRI service from an alternate serving central office, determined by the Cooperative, at no additional charge to the customer. The customer must accept the service central office location assigned by the Cooperative and must agree to revert to service from his local serving central office when ISDN-PRI facilities become available.

If ISDN-PRI service is provided from an alternate or "foreign" central office, the customer must accept a number change to one associated with the alternate central office and the local calling areas associated with the alternate central office.

When ISDN-PRI becomes available from the local serving central office for an ISDN-PRI customer whose service has previously been provided from an alternate central office, the customer will revert to the local service, accept a telephone number change to the local telephone number(s) and be subject to the local calling areas of the local serving office. No charges will apply to the transfer of ISDN-PRI service from an alternate central office to a local serving office.

E. TERMINATION LIABILITY

In the event an ISDN-PRI service is terminated by the customer prior to completion of a term commitment period, the customer shall be liable for the termination liability. The customer shall be required to pay a Termination Liability Charge determined as follows:

Termination =25% Liability Charge	X	(Number of Lines Terminated)	X	Monthly Rate Per Line	X	(Number of Remaining Months)
---	---	---------------------------------	---	--------------------------	---	------------------------------------

An ISDN-PRI customer may at any time renew a contract for an equal or longer period at the current tariffed rates subject to the following conditions:

- Credit will not be given for payments made during the formerly selected period.
- Nonrecurring charges will not be reapplied.
- The new contract period begins with the first billing date following the renewal.
- Termination charges will not apply for the former contract period.

F. FEATURES

The following features are provided at no additional charge for PRI arrangements:

Calling Number Identification - Provides identification of the calling party's ten digit dialing number to the PBX or host computer within a system.

Multirate - Provides a single circuit whose bandwidth is a multiple of 64 Kbps. The circuit consists of one or more "B" channels, as required for each call. Multirate is also known as N x 64 data service.

Clear Channel Capability - Allows customers to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits.

I. ISDN-PRI SERVICE (Cont'd)

G. SERVICE ADDITIONS, MOVES OR CHANGES

1. The ISDN-PRI Subsequent Activity Charge (SAC) is applicable for any changes to the customer configurations after initial installation. The SAC is applicable per occurrence.

2. For Contract/Term Commitment Arrangements:

During the contract period, the customer may add ISDN-PRI services at the monthly rates specified in the customer's contract.

If a customer upgrades from other Cooperative services that utilize the same facilities from their location and the local serving central office and a new contract is of equal or greater monetary value, the NRC charge will be waived.

If the tariff rates on a contract are lowered, the subscriber may be allowed to cancel his/her existing contract without penalty, provided that a new contract is signed for equal or greater monetary value. The customer will be subject to all terms, conditions and rates of the new contract.

Prior to the expiration of an existing contract, a customer may extend the contract for another contract period without incurring the termination liability charges.

When a customer elects to relocate his/her ISDN-PRI service to a different premises not served by the same central office, prior to the expiration of his/her contract, the service is considered to be disconnected and the termination liability applies. However if the customer relocates to a location served by a suitably equipped central office and establishes an ISDN-PRI contractual payment plan of equal or greater monetary value, the customer may relocate service without incurring any termination liability. However, all installation charges at the new location will apply.

DIGITAL SERVICES

I. ISDN-PRI SERVICE (Cont'd)

H. DESCRIPTION OF RATES

ISDN-PRI Service includes the following rate elements:

- ISDN-PRI Switched Facility
- ISDN-PRI Access
- Channel Activations
- Subsequent Activity
- ISDN Primary Rate Interface (PRI) - Switched Facility

1. The ISDN-PRI Switched Facility element is the line that connects the customer to the exchange and private line networks. Each ISDN-PRI line supports up to 24 channel network connections and uses digital technology to transport integrated capacity over a clear channel T-1 facility or functional equivalent.

2. ISDN Primary Rate Interface (PRI) - Access

The ISDN-PRI Access element provides the switch termination of the PRI line. A PRI Access element is required with each PRI line. PRI Access typically requires 23 individual B-channels and one D-channel. The B-channel is a bearer channel that carries digitized traffic at up to 64 Kbps. The D-channel is a signaling channel used to control and route B-channel traffic.

a. Channel Configuration of ISDN-PRI Access:

- ISDN-PRI 23B plus D
- ISDN-PRI 23B plus D-channel Backup
- ISDN-PRI 24B

b. The ISDN-PRI 23B plus D-channel provides 23 individual B-channels and one D-channel for signaling. A 23B plus D-channel backup configuration provides the ability to provision a second PRI D-channel as a backup D-channel. A 24 B-channel configuration allows all 24 channels to carry traffic while the associated signaling is provided by either a 23B plus D or 23B plus D-channel backup configured ISDN-PRI.

H. DESCRIPTION OF RATES (Cont'd)

3. Subsequent Activity

Nonrecurring charges for database configuration work will apply for all subsequent activity related to changes in channel configuration or ISDN-PRI attributes. The database charges are applied on a per-PRI, per-order basis.

4. Channel Activations

a. Channel activation charges will apply to provide traffic capability for up to 24 B-channels. Channel activations are monthly recurring charges applied on a per channel basis with the exception of B-Channel - DID Only, which has a nonrecurring charge applied on a per facility basis.

b. Types of Channel Provisioning:

D-Channel Backup - A "D" channel provisioned to automatically take over for a failed "D" channel in the event of trouble.

DID/DIOD Channel - A "B" channel provisioned with DID/DIOD Service. DID Service allows callers to dial from the public network straight to a desired extension within a PBX or Centrex system without operator intervention. DIOD Service allows the above plus allows outgoing calls from extensions of a PBX or Centrex system to be placed directly by dialing an access digit and the desired number without operator intervention.

WATS & 800 Channel - A "B" channel provisioned with WATS or 800 Service. WATS Service allows customers to make toll calls to specified service areas on a direct dialing basis. 800 Service receives incoming calls that are free to the calling party.

IXC Channel - A "B" channel provisioned to interconnect with various compatible services provided by an Interexchange Carrier or other service provider.

b. Types of Channel Provisioning: (Cont'd)

B-Channel - DID Only - A "B" channel provisioned with DID Service. DID Service allows callers to dial from the public network straight to a desired extension within a PBX or Centrex system without operator intervention.

Tie Channel - A "B" channel provisioned for dedicated connectivity between two customer switching points or between ISDN-PRI central offices that connect customer switching points.

Data Channel - A "B" channel provisioned for Switched Data Service. Switched Data Service provides end-to-end transport for switched digital data.

5. Term Discounts

Term Discounts are applicable to the PRI Access, PRI Switched Facility, and PRI Channel Activation charges for Voice Channels and Data Channels (up to 23 channels per individual PRI Access). Discount does not apply to D-Channel Backup. The term discount will be applied as follows:

- One year/12 months = 0% discount
- Two years/24 months = 4% discount
- Three years/36 months = 8% discount
- Four years/48 months = 12% discount
- Five years/60 months = 16% discount

II. IP CENTREX SERVICE

A. General

1. IP Centrex is a central office based service which provides key type features to multi-line business customers.
2. All IP Centrex lines, trunk access or intra-group access, require both the switching access and loop access components in order for service to be offered by the Telephone Company. The service also requires a sufficient broadband connection. Broadband is not a tariffed component of this service.
3. IP Centrex will be offered in wire centers where such equipment exists to provide the service. Customers must use Internet Protocol (IP)-capable telephony devices for all features to work properly.
4. One directory listing is provided without charge for each IP Centrex system. Additional directory listings for IP Centrex stations may be provided to the customer at the regular business extra listing rate according to the regulations set forth in Section 7 of this tariff.
5. The customer will order the quantity of lines to have trunk access to the public switched network and the remaining quantity of lines to have intra-group only access, subject to Telephone Company standards. Any request to deviate from these standards will be rated on an individual case basis. Any trunk access connections terminating in a PBX will be assessed the PBX rate found in Section 4 of this tariff. Any trunk access connections terminating in a KEY system will be assessed the KEY rate found in Section 4 of this tariff.
6. Tie lines for direct connections between Poka Lambro IP Centrex groups and other systems are provided primarily for communication between stations within each system.
7. All general Rules and Regulations found in Section 3 of this tariff apply to the provision of IP Centrex service.
8. IP Centrex lines and extensions may be terminated at the customer's single premises or at different premises served by the same central office.

II. IP CENTREX SERVICE (Continued)

A. General (Continued)

9. The service is not available for use with residential service or Pay Telephone Access Service.
10. IP Centrex Service may not be used to resell local or long distance service.
11. E911 Service accessible via IP Centrex Service is subject to limitations as outlined in Section 3. II.G, General Rules and Regulations.

B. IP Centrex Package

1. Trunk access provides a maximum quantity of IP Centrex stations full access simultaneously to the entire public switched network. This maximum quantity is referred to as IP Centrex Trunk Access lines.
2. Intra-group only access provides a customer's IP Centrex stations restricted access only to other stations within the predefined IP Centrex group. This access is referred to as intra-group (IG) lines.
3. IP Centrex customers subscribe to service based on the total number of access lines which may process trunk access calling simultaneously. All lines ordered by the customer have the capability for trunk access. However, only a given quantity of lines ordered by the customer can process trunk access calling simultaneously, with all other lines in the group being left to process intra-group calling only. As an example, if a customer orders 20 lines and wants a quantity of 5 lines to have trunk access capabilities simultaneously, if any given 5 lines are processing trunk access calling, the remaining 15 lines will only be able to process intra-group calling until one of the 5 lines processing a trunk access call terminates the call.
4. The customer may order optional features which are listed in Section 11 of this tariff.
5. End User Common line charges (EUCL) will be billed as set forth in FCC rules.

II. IP CENTREX SERVICE (Continued)

C. Definitions

Abbreviated Dialing Codes

1) An arrangement where typically 3, 4, or 5 digits are used to call another station within the same customer group; or (2) Frequently called telephone numbers may be accessed by dialing single or multiple digits. Telephone numbers are programmed into the IP Centrex system and correspond to assigned digits also known as Speed Calling.

Customer Group

A collection of stations where calls originate and terminate within the IP Centrex system of a single IP Centrex customer.

Dual Tone Multi-Frequency

A method of telephone signaling which transmits two simultaneous tones at different frequencies to signify a digit (as part of a telephone number).

Hunting

A search through a group of numbers until an idle station is found or the first number of the group is reached. Used to avoid having incoming calls receive busy signals. The customer group to be searched and the sequence in which the search will be performed are defined by the IP Centrex customer at the time the system is installed.
